1. Import PDF files or images

Import PDF files

1. Click the Import button. Click Browse button to choose PDF files you want to convert. You can click Preview button to open the chosen PDF file and clarify.

2. Select page ranges to import: all or customize certain pages. Don't know which pages to import? The Preview window allows you to view each page of the PDF file.

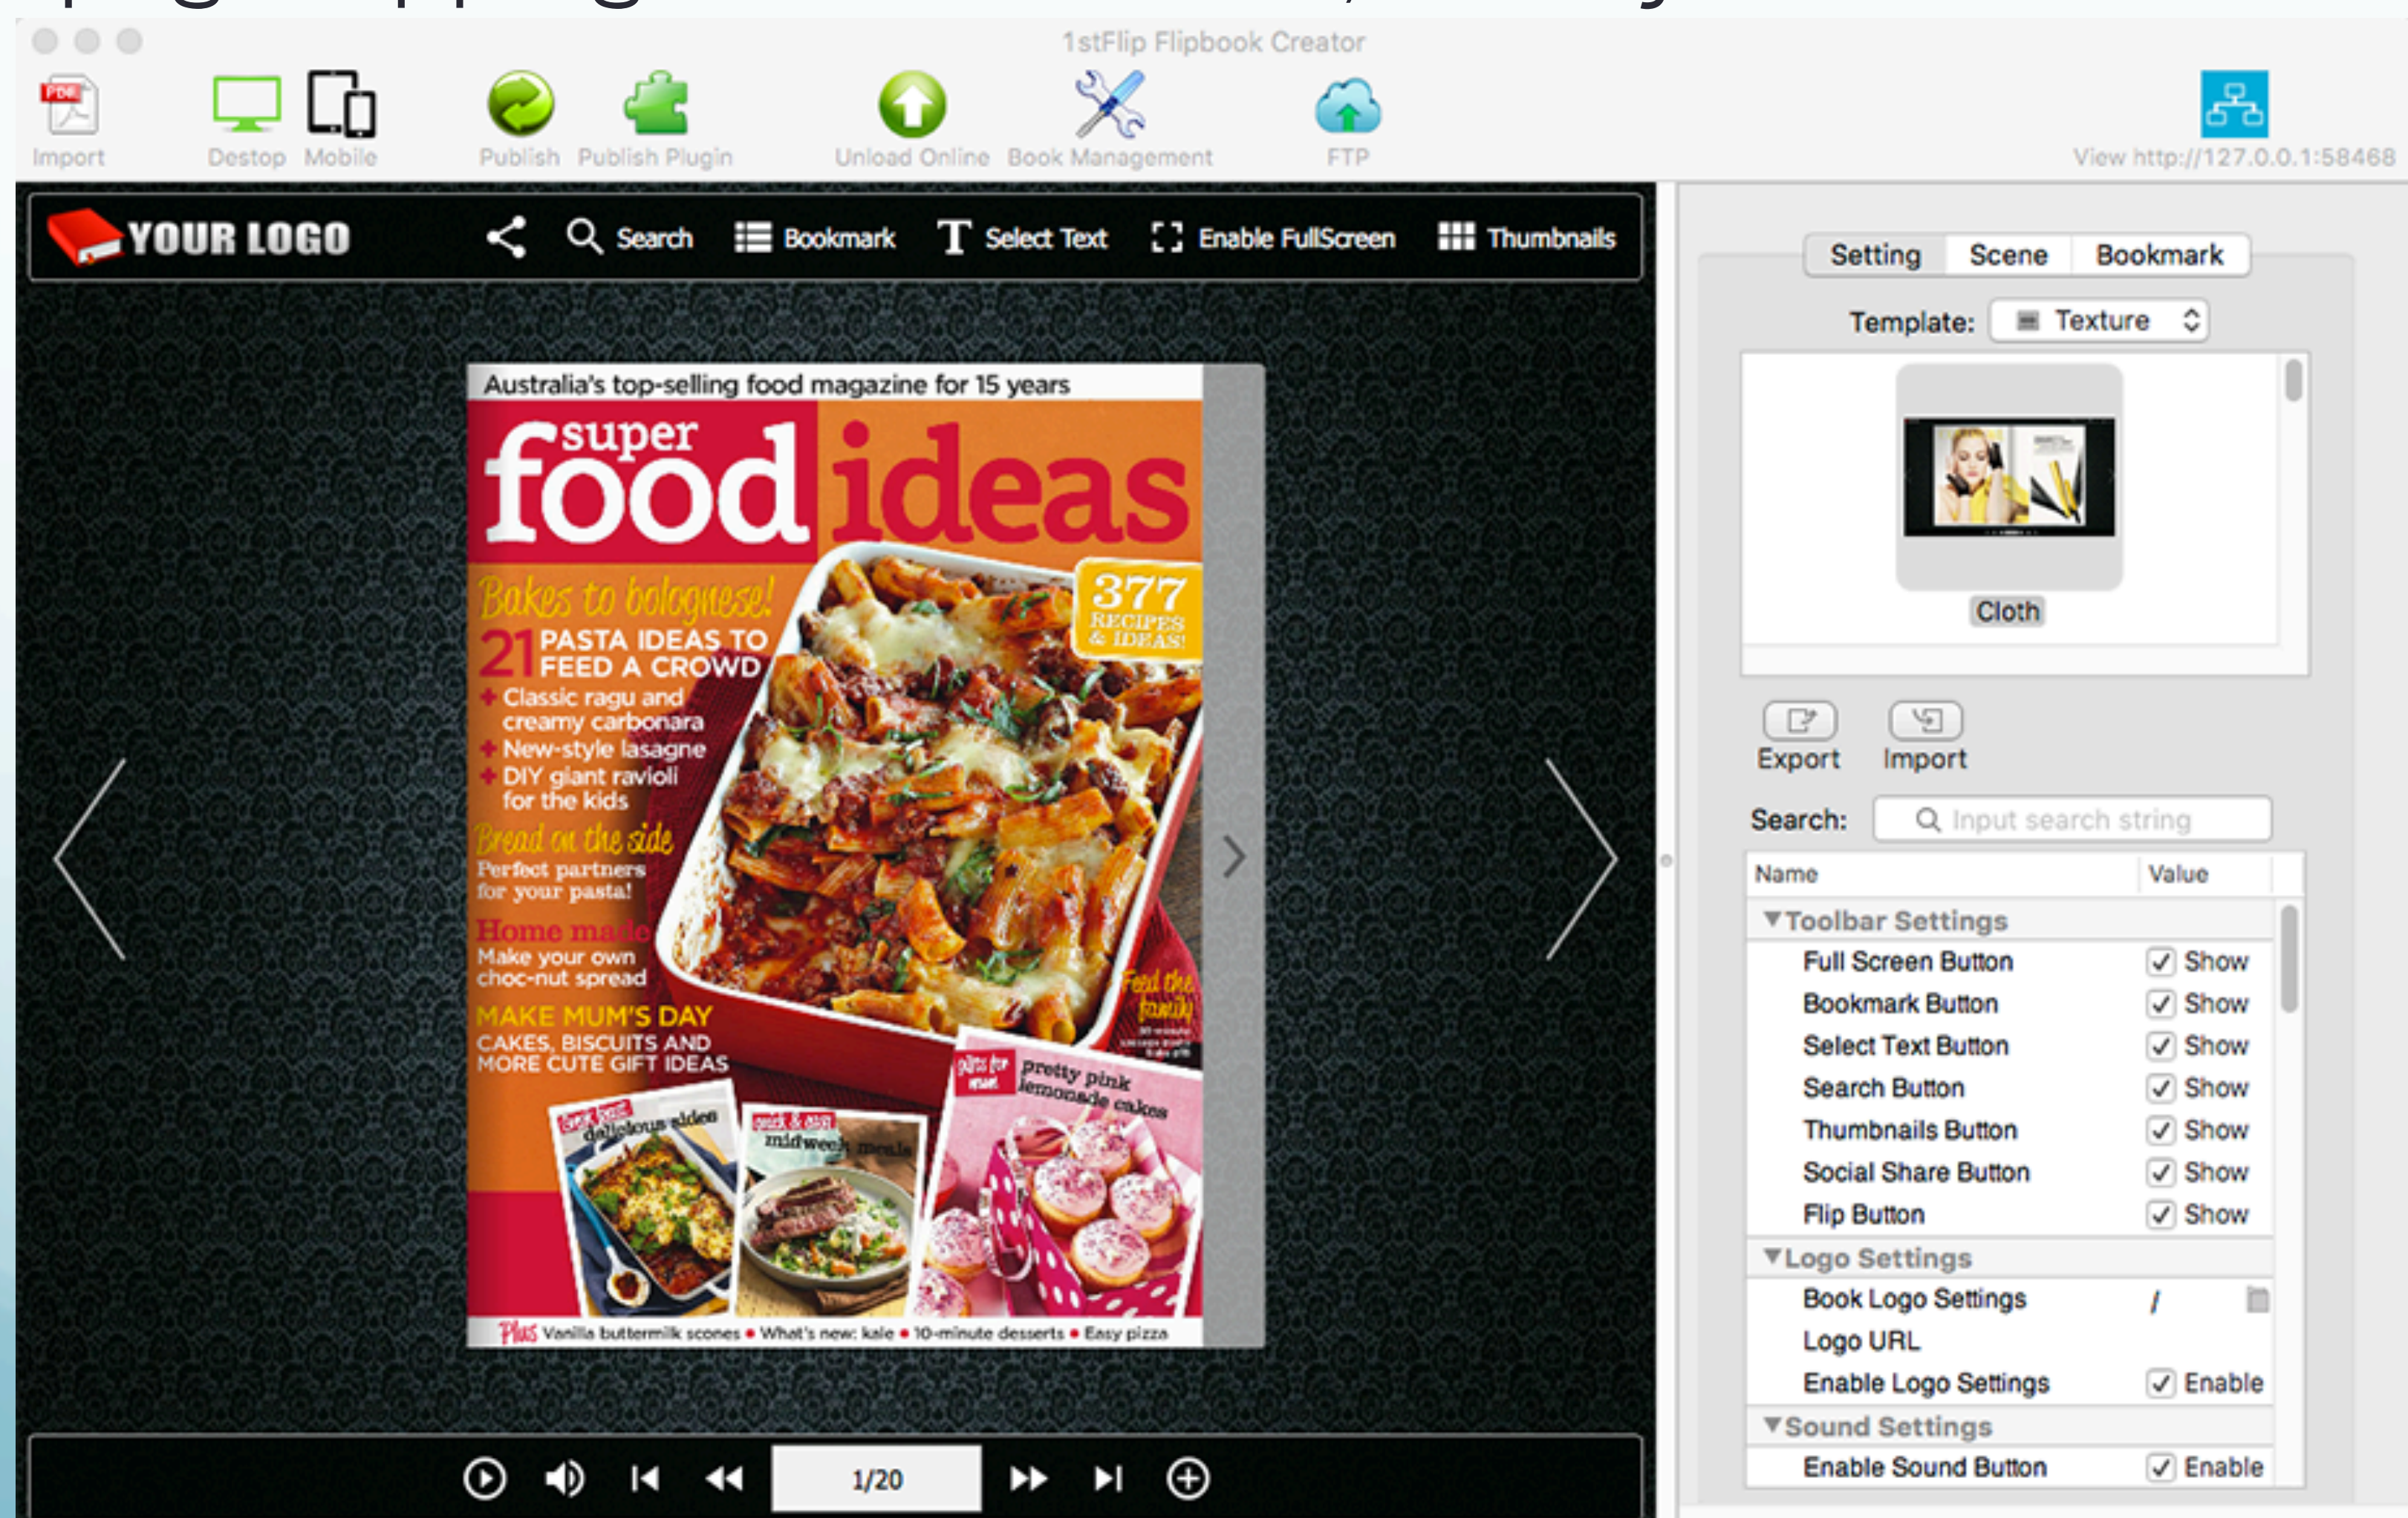

3. Set page quality: Higher, High, Medium, Low and Lower.

4. Choose page format: Vector(.swf) or Raster(.jpg).

5. Other import options:

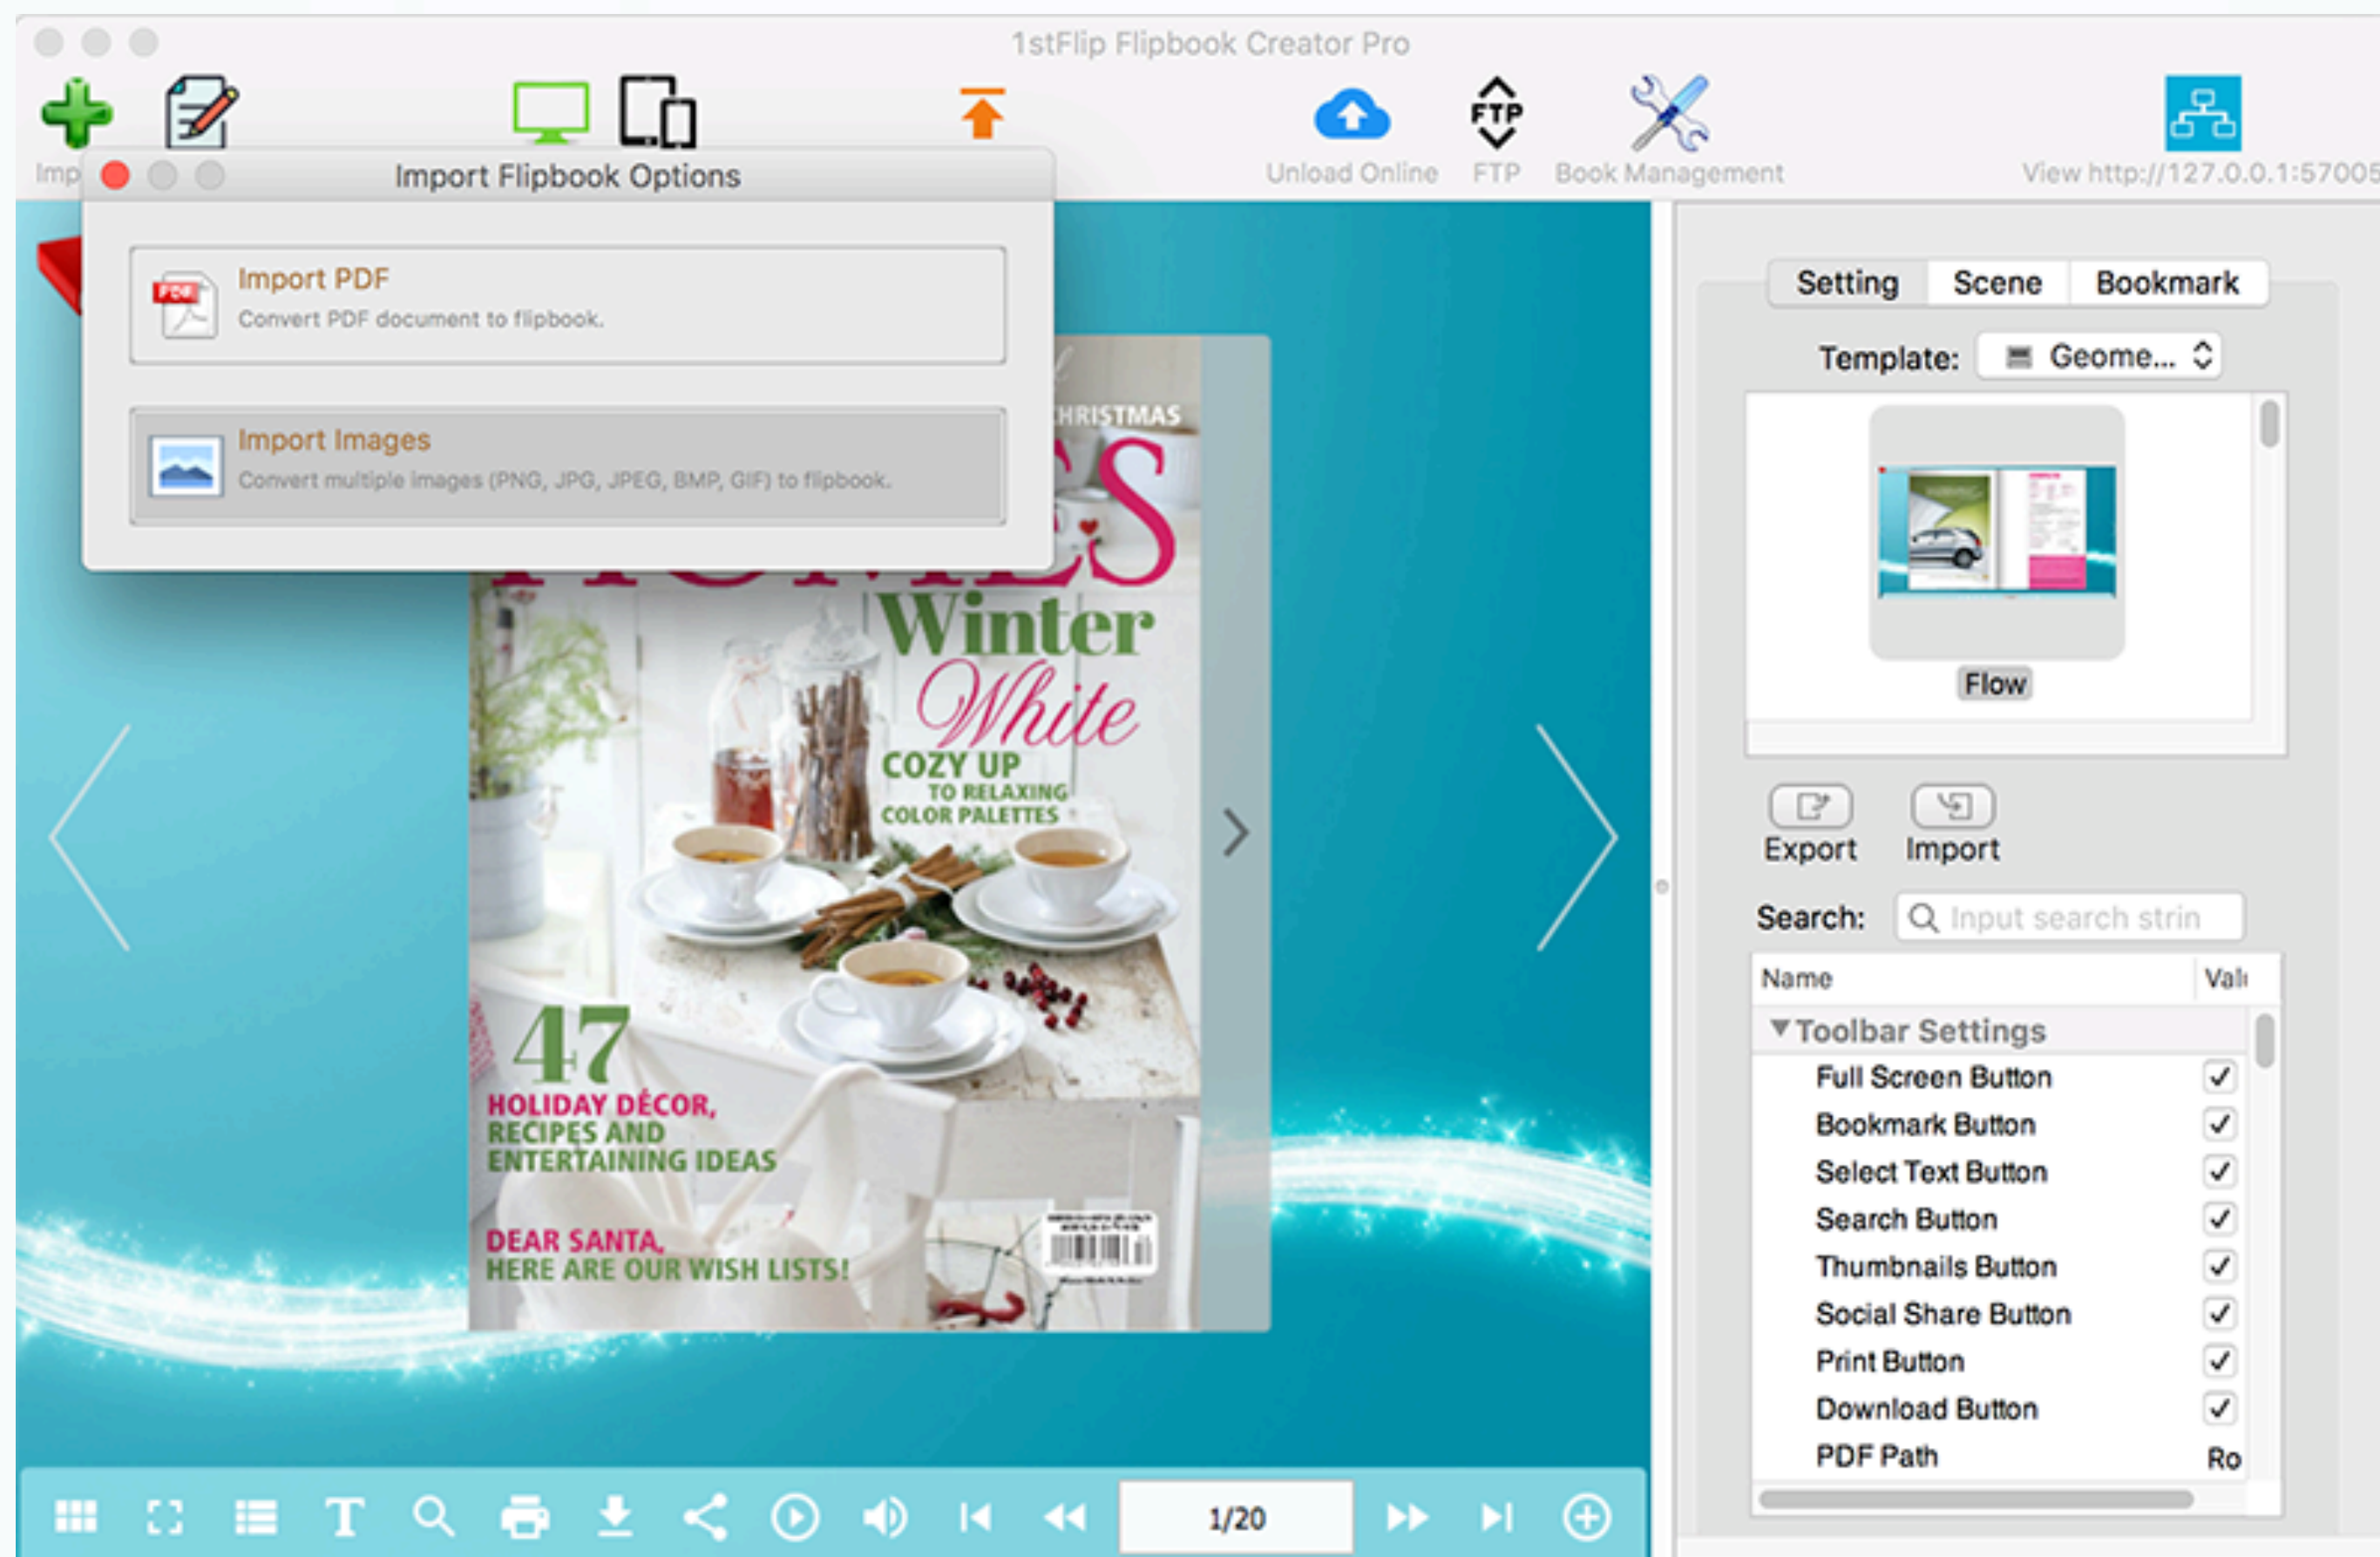

- Import bookmarks: Bookmarks in the PDF file will be available in the converted flipbook if you check this option.
- Support searching: Search any content within the flipbook.
- Import links: Links in the PDF file will be preserved in the converted flipbook if you check this option.
- Detect wide pages: Automatically detect wide page and then split it into two pages.

After all these settings, click Import button. Then you can see the PDF file in the interface. Now the page-flipping effect is added; what you see in the

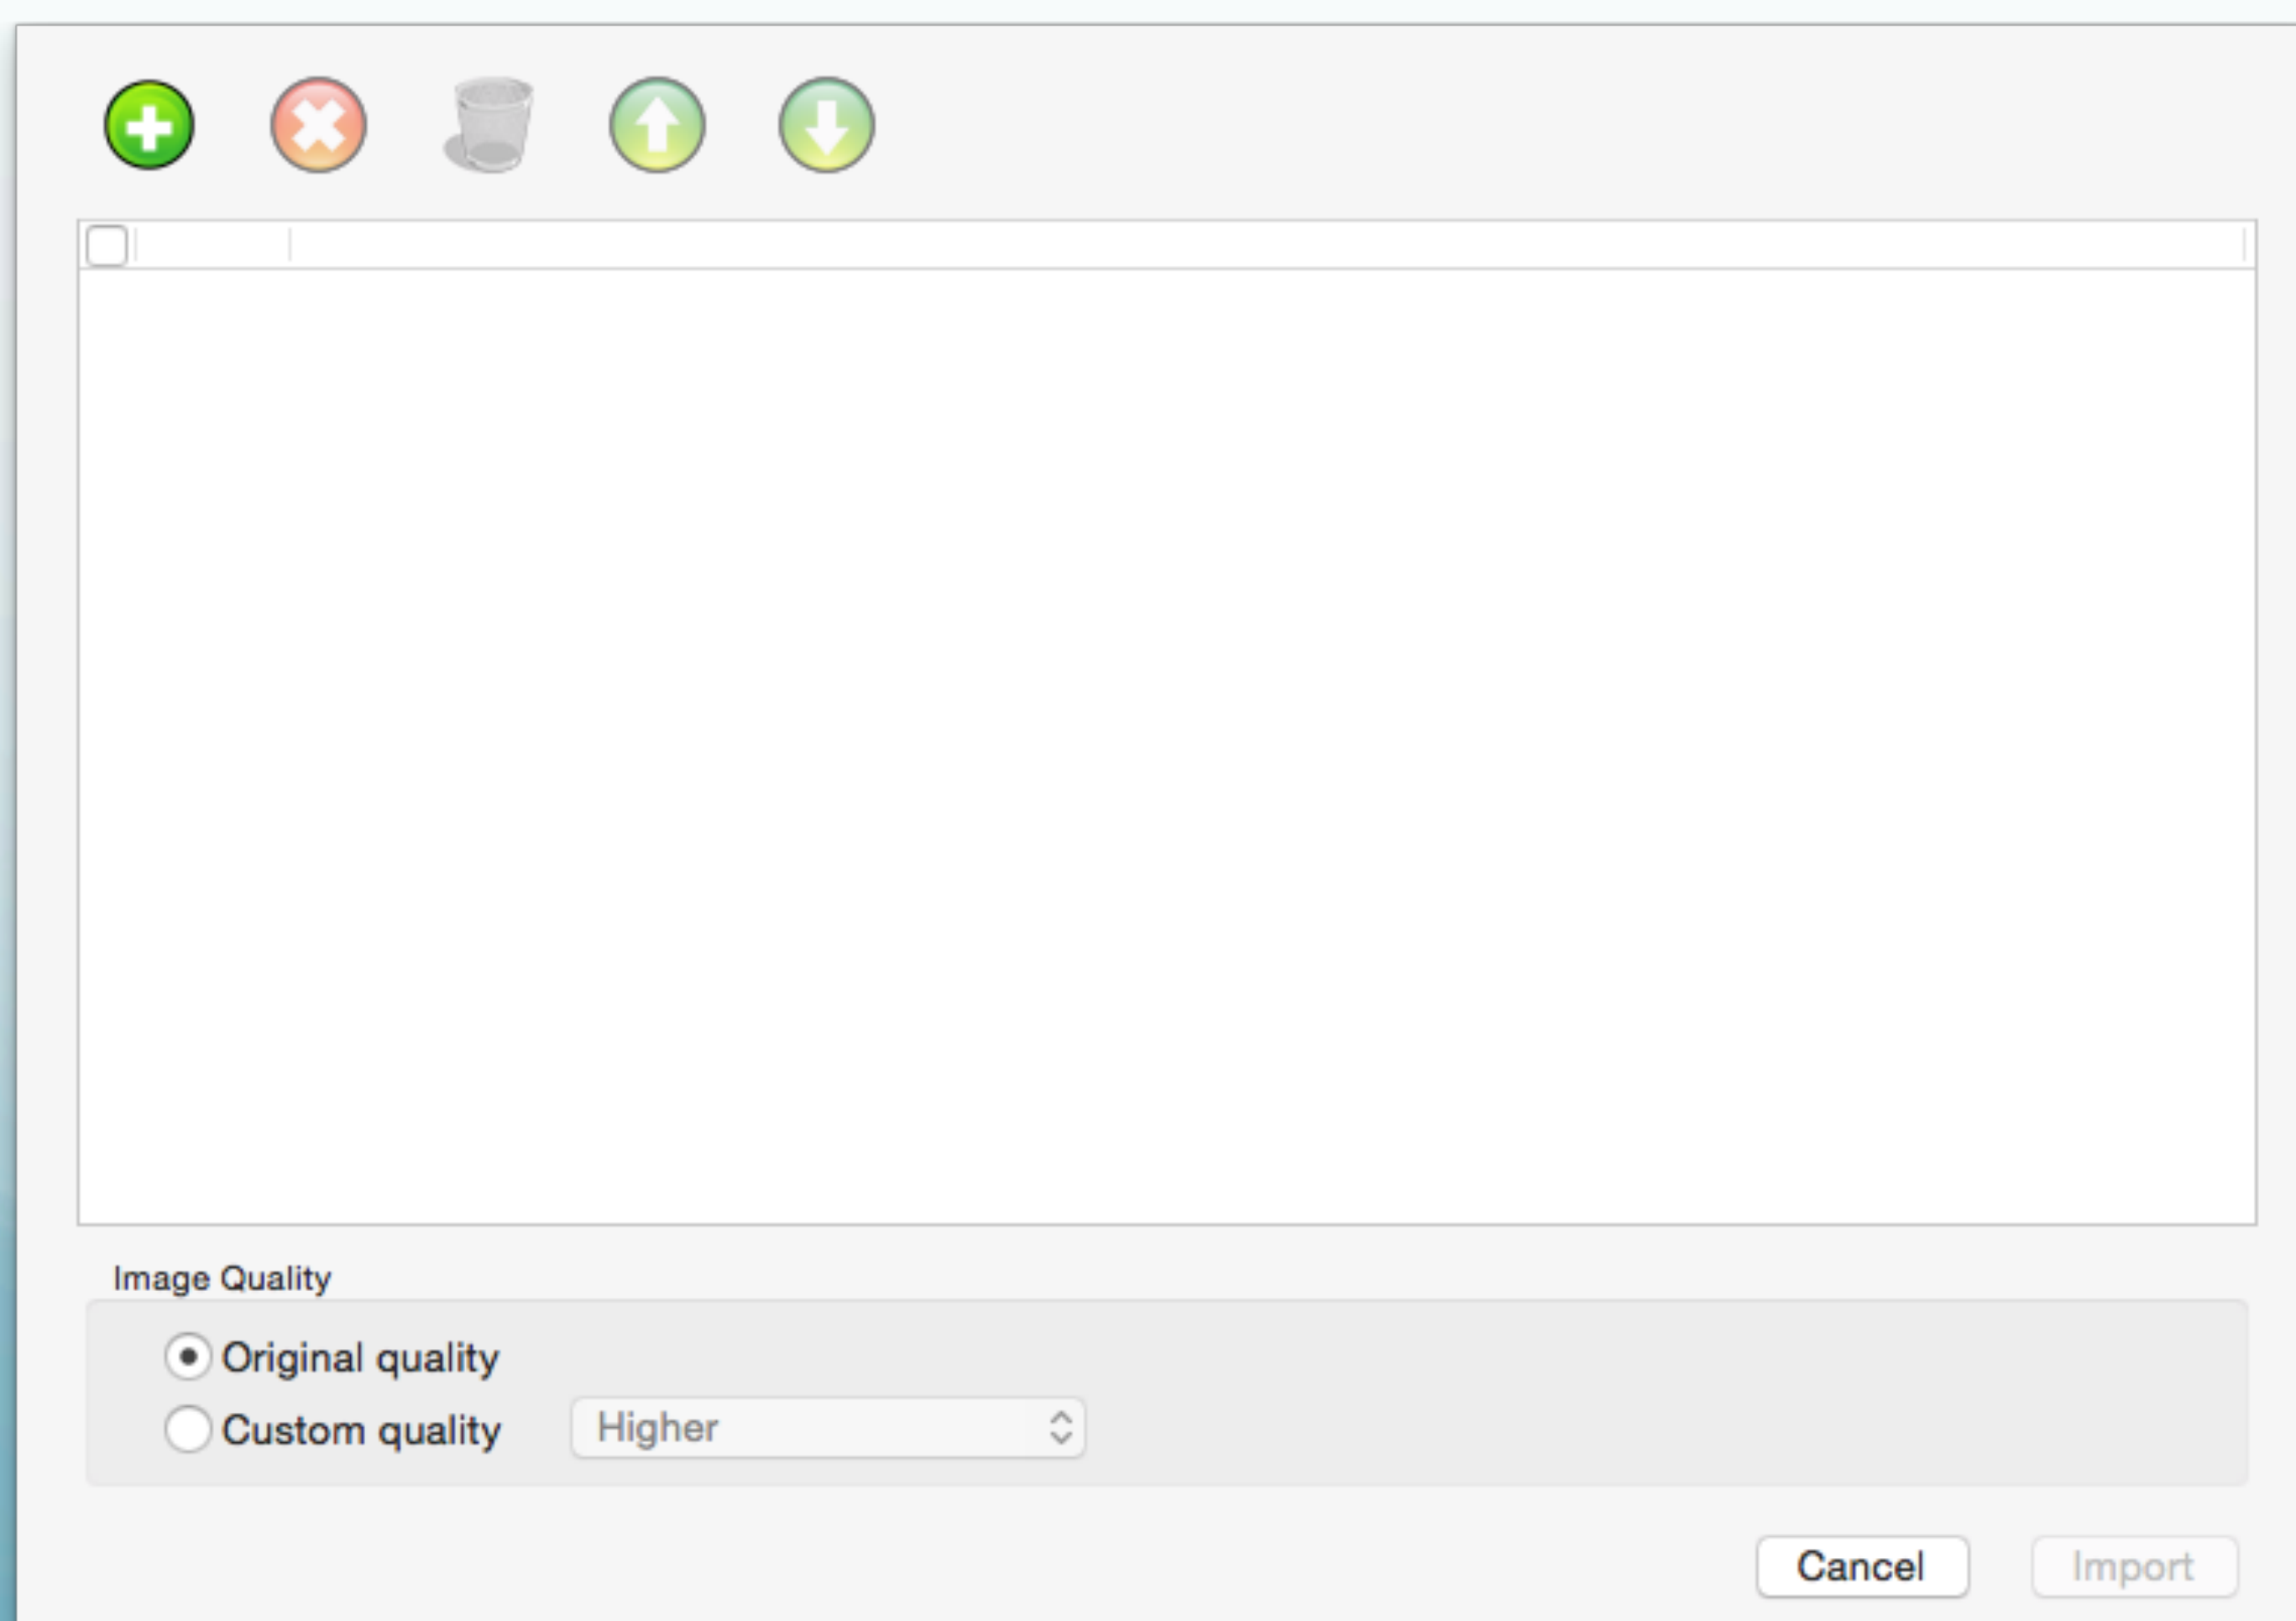

Import images

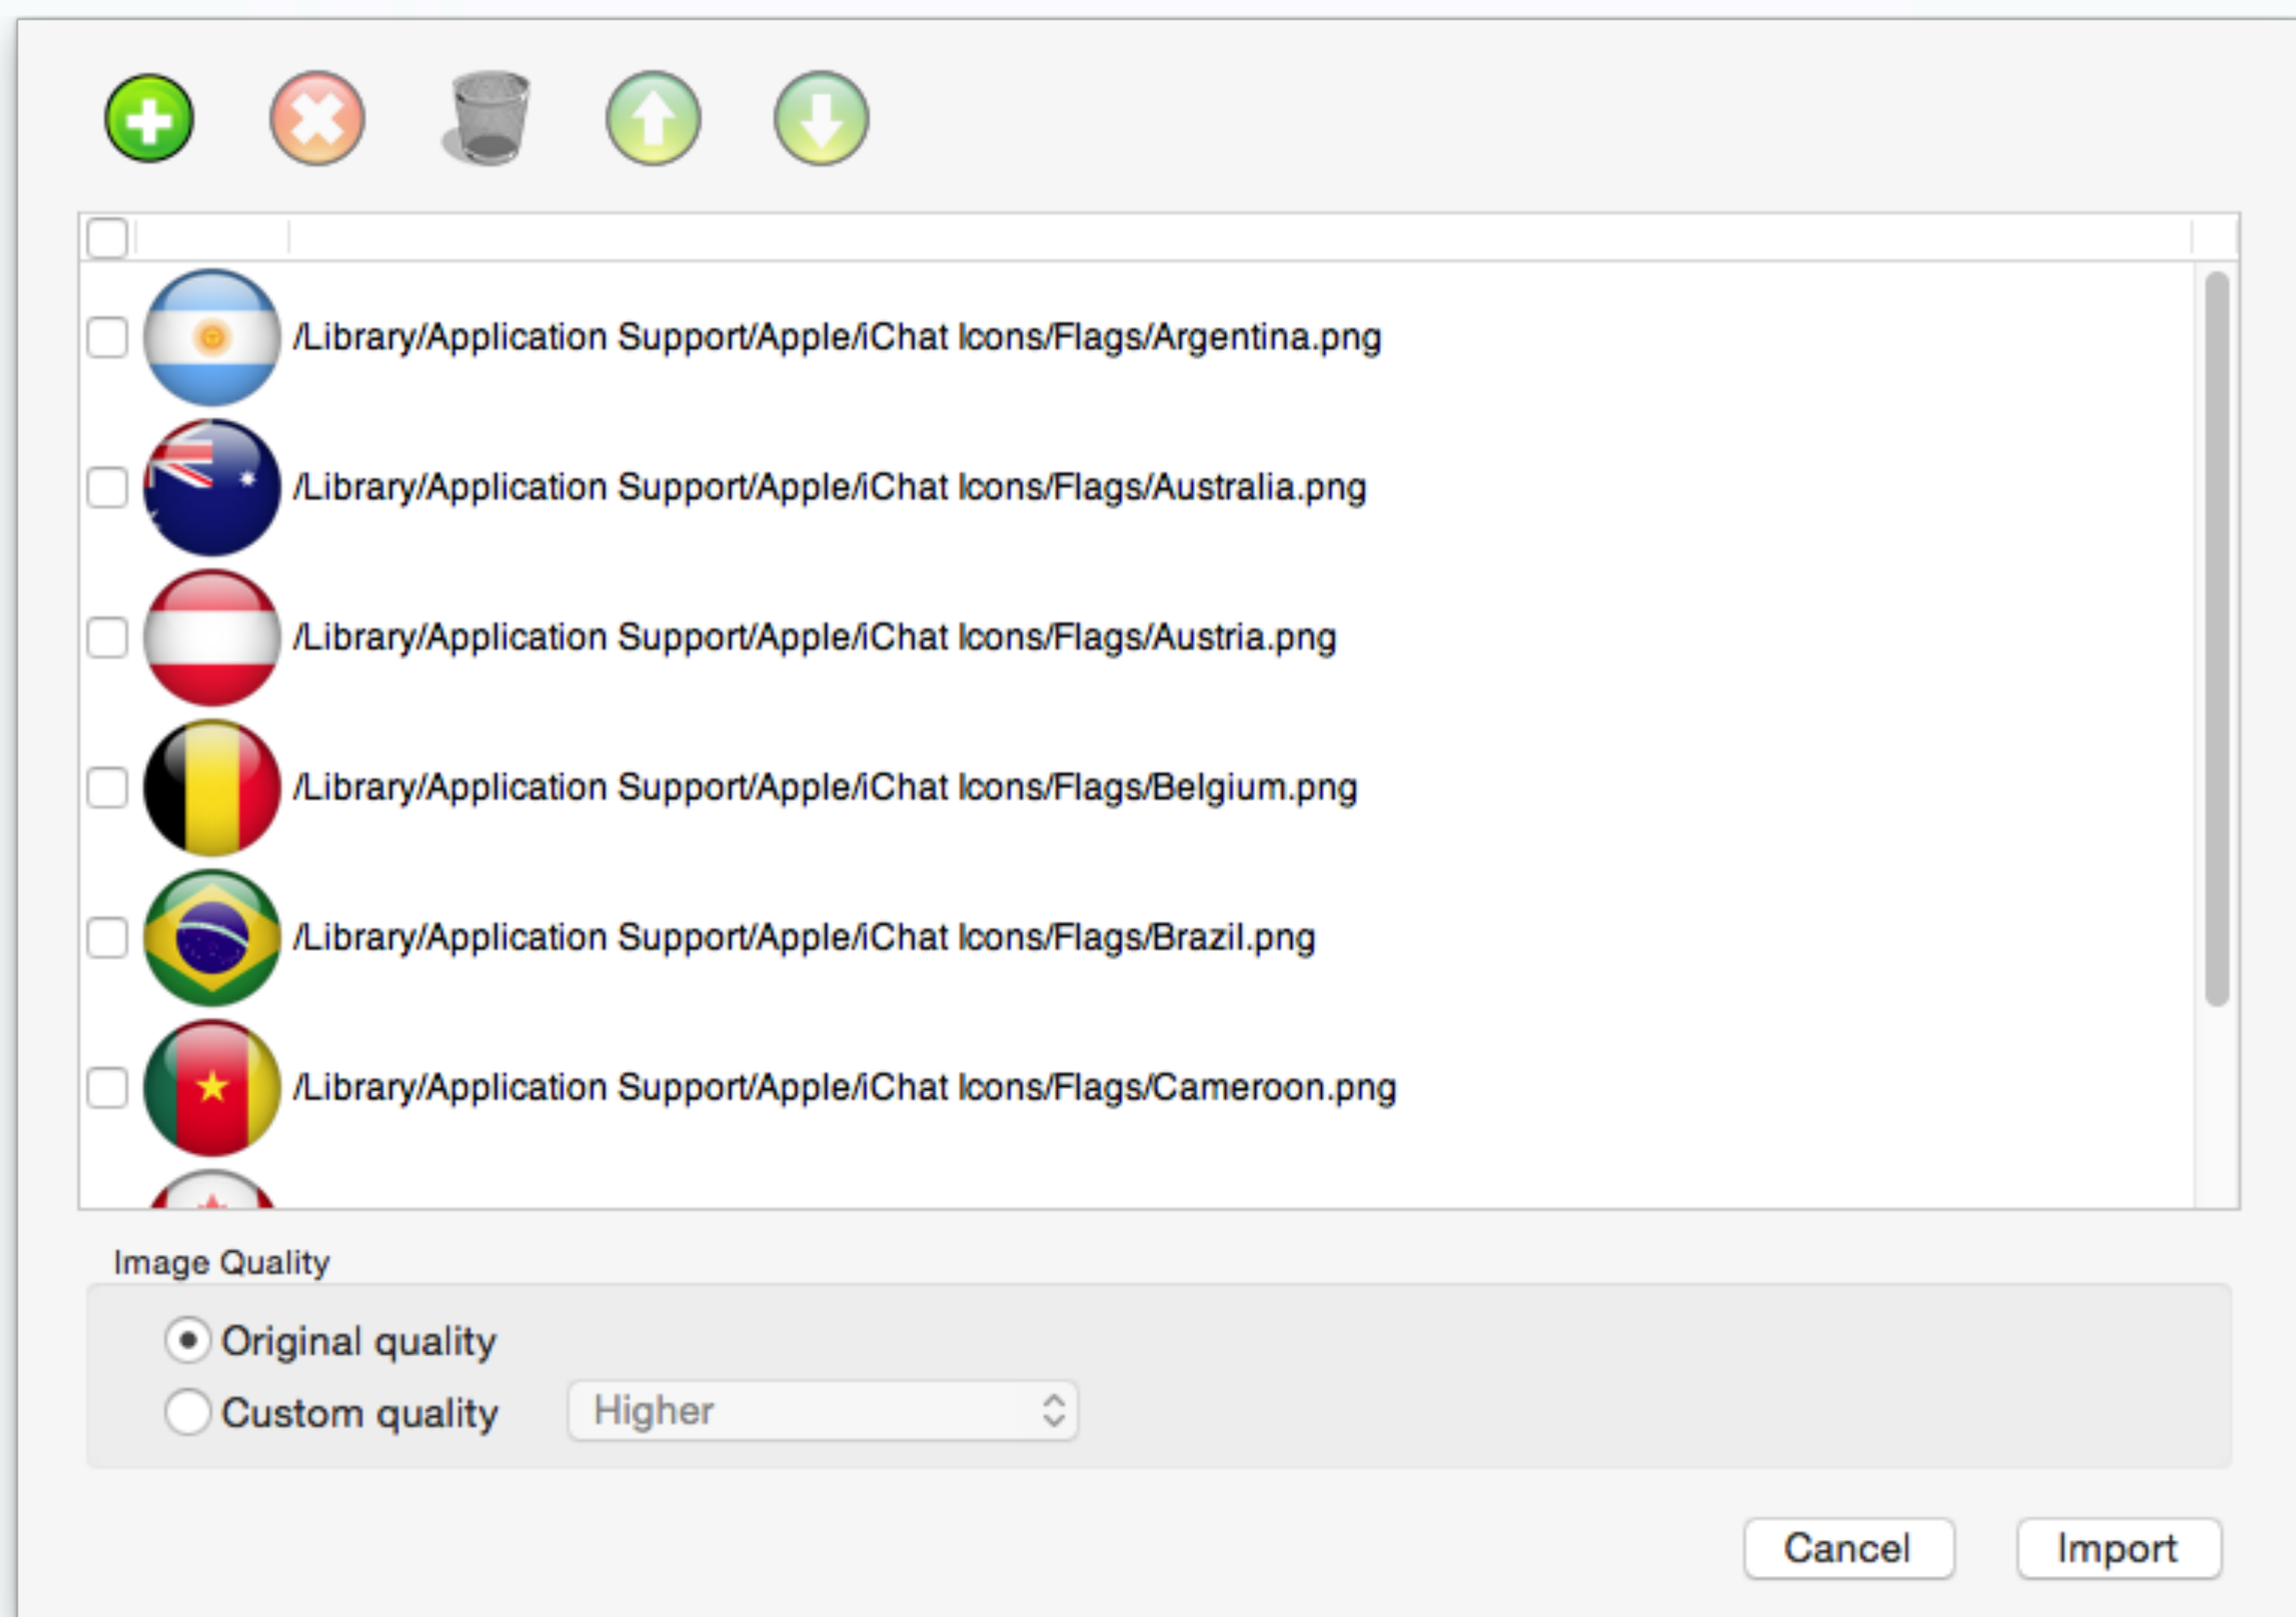

Click the Import images button:

Click  to add images,  to remove unwanted ones,  to delete all,  and  to adjust orders.

Set the image quality and click Import.

2. Setting, Template, Scene and Bookmark

As you can see from the right side of the interface, there are 2 tabs: Setting and Scene, which allow you to customize your flipbooks for the best reading effect.

- **Setting.**

This tab contains two parts: Template and detailed settings.
